

ABOUT MADIMACK Australia's authority in Heat Pump technology.

Madimack is Australia's authority in Heat Pump technology, specialising in the delivery of premium, sustainable, electrical solutions to market. We believe in innovation without compromise, with a focus on engineering products that increase industry standards, drive technology, increase efficiencies and reduce Australia's carbon foot-print.

Fully Australian owned and operated, Madimack was founded on 50 years of industry expertise and a rigorous commitment to ongoing research and development in technology and renewable energy. Today, via an integral combination of key national distributors and expert international partners, Madimack has both the access and insight to drive advancements in residential and commercial energy solutions for all Australians.

Madimack represents premium design, efficiency and smart-feature integration. Our products are supported by market leading warranties and unrivalled customer service, which, along with a singleminded focus on 'driving innovation without compromise', guarantees our clients the very best in energy solutions.

"

Productreview.com.au 5 star rating

We cannot recommend it more! From our first point of contact, the whole process has been seamless and professional. The Madimack Heat Pump has heated our pool to 35 degrees and now we swim all year round. Absolute best investment you could make for your home. Can't recommend Madimack Pool Heating enough, you will be impressed with their product from start to finish.

- David and Leah Campbell -

WHAT ARE HEAT PUMPS?

Leading global renewable resource based on efficiencies and performance.

Heat pumps work by transferring the heat from the air outside a heating unit to the water stored inside a heating unit via a 'heat exchange system' and then pump that heated water into your pool. Heat pumps are the most energy efficient way to heat your pool, using approximately one third of the energy used by alternative pool heating systems.

The benefits of Heat Pumps are various and include;

- Source of renewable energy
- Effective in low temperatures
- · All round superior efficiencies
- Convenient no roof space or panels required
- Ease of installation (uses existing connections)
- High grade production and engineering means extended life spans & less maintenance
- Safe (no combustion)
- Supported by ongoing development and innovation (international growth industry)

Heat pump technology is quickly becoming a leading global industry, heavily weighted as a solution for 'net-zero' targets. Developments are burgeoning domestically and internationally, driven predominantly by governmental policy and consumer demand for "net-zero" initiatives.

OUR HEAT PUMP TECHNOLOGY

Innovation without compromise.

As with all industry, leaders are identified by their ability to provide market extensions, drive innovation and advance technology. In that vein, Madimack's commitment to research and development continues to position them as the Australian authority in Heat Pump technology. Our Heat Pumps are tech-advanced, light and easy to install, making them ideal for backyards and commercial premises.

Madimack Heat Pumps are supported by advanced technologies and market leading warranties. Manufactured from the highest quality components and tested above industry requirements, they include a titanium heat exchanger combined with a corrosion resistant evaporator coil and come with a Heating Performance Guarantee. Madimack Heat Pumps are TuV certified. TuV Rheinland is an international engineering testing body that is used to satisfy performance and quality metrics to international standards. Carried out on a voluntary basis in Australia, the program tests units in random conditions to confirm they perform as promoted.

WHAT SETS US APART

- 10 year warranty on compressor
- TüV Rheinland tested
- Highest efficiency
- WIFI included across the range
- Patented quietest unit
- Full inverter technology
- Touchscreen easy to use controller
- Night Mode
- Built in flow switch
- Dual defrost system
- Titanium heat exchanger
- Reverse fan for quieter operation
- Compatible with Solar PV
- R32 Eco friendly refrigerant
- Latest electronic expansion valve

SERVICES

- Free to use online calculator
- Online warranty portal with 24-hour response
- In depth installation and user manuals
- Ontractor installation, training and advice
- Commercial energy modelling

INVERTER TECHNOLOGY

- Longer unit lifetime by up to five years
- Higher efficiency than on/off units
- Night mode and quite mode built in
- Soft start operation

EFFICIENT HEAT PUMP SERIES

Built with efficiency and simplicity in mind, the quiet, long lasting and easy to use Eco is perfect for energy conscious minds. Encased in 'state of the art' anti-corrosion ABS casing, the Eco will keep your pool warm season after season. Madimack units include WiFi as a standard function, providing the convenience of being able to change your pool's temperature and timers from wherever your day takes you. Additional benefits include 'low energy' and 'night time' modes, enabling heating efficiency to increase by up to 20%. Madimack's Eco pool heating system provides everything your family needs for an extended season of pool-time fun.

- Energy efficient with COP up to 11
- Full inverter compressor and inverter fan
- Five models up to 24 kW in single phase
- Quieter operation than on/off technology
- Anti-corrosion ABS casing
- Easy to use controller
- Slim design
- Wi-Fi as standard

- ▼ Titanium heat exchanger with 25-year warranty
- Front discharge air outlet
- Reverse cycle defrost
- Built-in flow switch and safety devices
- Latest most eco-friendly R32 Refrigerant
- TüV Rheinland certified
- Up to 40 degrees set point temperature

ADVANCED HEAT PUMP SERIES

The Elite V3 has been redesigned from the ground up to bring a revolutionised pool heating system to the Australian market. In conjunction with the newest inverter technology the unit delivers better airflow, higher efficiency, quieter operation and performance. The unit exclusively delivers market leading installation requirements of 100mm from the back and 300mm from the side, providing space saving options for Australian backyards. Engineered with durability in mind, the Elite V3 operates at optimal levels even in the most corrosive and erosive environments - Achieving a massive 31.8kW in a single phase. The Elite V3 sets the standard for all other heaters.

- Revolutionary design that redirects airflow to dramatically WiFi with smart functions
- Extremely energy efficient with a COP of up to 16.4
- Full inverter stepless compressor and fan
- Sleek design
- Six models up to 31.8kW in single phase
- Three phase 40kW model
- Patented slient design
- Marine grade anti-corrosion aluminium alloy casing
- Signature diamond touch screen and intuitive display

- Marketing leading 10 year compressor warranty
- Newest most eco-friendly R32 Refrigerant
- Three coil evaporator for a more compact unit size
- TüV Rheinland certified
- Up to 40 degrees set point temperature
- Industry first centrifugal fan
- Advanced cold air performance
- Largest industry single phase unit

<u> LCIIPSE</u>

COOLING AND HEATING SERIES

Designed and engineered to meet the highest requirements for cooling and heating options, with full inverter compressor and top discharge fans for a streamlined efficient air flow; rest assured that you own the latest eco friendly technology. Enjoy new possibilities for pool heating and cooling with the space saving and slick design. Limited space is no longer a concern.

- Full inverter stepless compressor and fan
- Titanium heat exchanger with 25-year warranty
- Advanced cold air performance
- Built-inflow switch and safety devices
- Extremely energy efficient with COP up to 16
- Wi-Fi as standard
- Cooling and heating

- Top discharge air outlet
- Built-inflow switch and safety devices
- Newest most eco-friendly R32 Refrigerant
- Enables more options to fit in space
- Easy to use controller
- 3 models up to 26kW singlephase
- Marine Grade anti-corrosion aluminium alloy casing

COMMERCIAL HEAT PUMP SERIES

These powerful commercial heaters have the capacity to cope with the demands of any aquatic facility. Built with cutting edge technology and climate adaptive features, the Madimack commercial range keeps up all year round while reducing energy bills significantly. Of particular note is Madimack's market leading ELITE MAX 60 —it is an industry stand out, leading in physical size and performance. Madimack's commercial units offer WIFI as standard.

MAIN BENEFITS

- Extremely energy efficient with C.O.P up to 16.1
- Full stepless inverter compressor and fan
- Dual Defrost
- Marine grade aluminium & stainless steel option
- RS485 connectivity ready
- Titanium heat exchanger with 25 year warranty
- Top discharge air outlet
- Reverse cycle defrost down to -15 °C
- Offsite monitoring with Madimack Care
- Industry leading physical size to performance ratio
- Up to 40 degrees set point temperature

COMMERCIAL RANGE SERVICES

- Bespoke system designs
- Energy modelling
- Full HVAC system
- ✓ Heat recovery
- Dehumidification
- Ventilation controls
- Integrated energy systems
- Servicing and maintenance
- Potable hot water generation
- Smart controls

Heater sizes indicated above are selected from our wide range of heat pumps and some may require multiple units to match the KW required. Average pool dimensions used.

Pools with greater surface area will suffer greater heat loss and may require larger unit. Average temperature, humidity and wind speed used for calculations, heat pump sizing in each location may vary on exact location. A thermal pool cover has been used for calculations in 'when a cover is used' table, other types may change requirement

At start-up from cold the heat pump will need to run for a longer period to reach the set temperature. Please see Madimack FAQ for more information.

This table is to be used as a guide, please consult your installer. Madimack accepts no responsibility for incorrect sizing based on this table.

Inverter Plus

POOL PUMP SPEED CONTROLLER

The Madimack Inverter Plus turns a single speed pump into a variable speed pump – plug & play, no electrician required. This means that the cost to run a single speed pool pump can be dramatically reduced, saving up to 80% on operational costs annually. Additional benefits include; dramatic energy savings, reduced noise factor and onscreen smart display features.
